Is PrEP right for you?

PrEP is a newly available HIV prevention strategy, not a cure for HIV

PrEP

Pre-Exposure Prophylaxis is where HIV- negative people take medication to reduce their risk of getting infected with HIV

Adherence Matters

Risk for HIV infection reduced by 92% to 99% among those who take PrEP daily and consistently

Safe & Well Tolerated

Nausea is most commonly reported side effect but typically goes away after first month

Coverage

Most insurance and Medicaid cover Truvada for PrEP with payment assistance program available for those who qualify
